# Homework #4

(Deadline : 2020/10/19 Tue. 14:00)

- What's the “all mAP” of coco dataset after training?
- Do you think the mAP is high enough?
  - You need to say your reason.
- Is IVS\_3cls a good dataset?
  - You need to propose some method to verification your answer. (Ex. Some test data to proof of other)
- How can we increase a model's mAP?
  - Give some reasonable method.

# Homework #4

(Deadline : 2020/10/19 Tue. 14:00)

- **Deadline : 10/19(Tue.) 14:00**
- **FTP :**
  - IP : 140.117.157.135
  - Account / password : MLVD / tars110
  - Folder : HW4
  - Filename : Group**N**\_HW4
  - Hand in the report with all the teammate's answer.
